ONOWAY'S SPORTS DAY

THURSDAY, JULY 11TH.
All Kinds Sports. Dance in Evg.

Long Trip, No Game.

Our baseball team motored up to Wildwood on Friday, to participate in that town's sports day. But, it seems, a sloudburst had got there first, so when our boys arrived the ball diamond and its adjacent territory were covered with water.

Engagement Announced.

Mr and Mrs John Guley, of Edmonton, announce the engagement of their elder daughter Helen Margaret to Rev Lawrence G. Sieber, B.A., B.D., pastor of the United Church at Stony Plain. The wedding will take place early in August.

Oulton-Ferries.

A quiet wedding was solemnised at the home of Mrs E J Tate, in Edmonton, on Wednesday, July 8, when Alice Jean Ferries, daughter of Mr and Mrs Ferries, Bluffton, became the bride of Avarid Oulton, of the Stony Plain district. Rev E J Tate officiated at the ceremony.

Miss Clara Fry, Edmonton, was bridesmaid; and Mr Harvey Oulton, brother to the groom, was best man.

The Newly-weds left on a motor trip to California, and will make their home on the bridegroom's farm, near Stony Plain after August 1st.

At Tillicum Camp.

Tillicum Camp, at Edmonton Beach, is quite a lively place at the present time, 35 of Edmonton's boys having been brought out to the camp on Thursday last, in cars belonging to members of Rotary Club. The members drove the boys to the Beach immediately following the regular Rotary luncheon. This group of boys will make a stay at the Camp for two weeks. The Camp is under the supervision of Mr Joseph T. Barratt, head of Rotary Club boys' work and camp director.

Young Liberals to Meet.

On Thursday of this week a meeting to organise a Young Liberal Club for Stony Plain Constituency will be held in Kelly's Hall at 8 p.m. It is expected that a number of the members of Young Liberal Club of Edmonton will be present. All young men interested in this organisation are cordially invited to be present.

Leader Howson Coming.

As the nominating conventions are almost completed for the Province, and W R Howson will now be free to speak in the other Constituencies, it is understood he will address a Liberal mass meeting in Stony Plain in the near future. Watch for the exact date.

Mr Howson is broadcasting on every Monday evening at 8.45, over Station CJCA, Edmonton.

Tea at its Best

"SUNSHINE" TEA

Be Careful!

On Dominion Day in a riot at Regina, precipitated by relief camp strikers when police attempted the arrest of their leaders, one man was killed, in the neighborhood of one hundred persons more or less seriously injured, and damage done to property estimated at around \$25,000. The news of this happening filled the papers, newspapers' "extras" flooded the streets, reports were telegraphed all over the continent, and cables carried the news to Great Britain and foreign lands. For a time it was almost the sole topic of conversation, and called forth questionings and discussions in the House of Commons. The Federal Government promised a searching investigation.

The Ontario Government is publishing a series of advertisements in the newspapers of that province. One such advertisement appearing almost simultaneously with the Regina riot says: "In Ontario, during 1934, there were nearly 10,000 automobile accidents, 512 people were killed, 8,990 people were injured, a considerable increase over 1933." No estimate was given of the property damage resulting from these 10,000 accidents, but it must have reached a total well up into the hundreds of thousands of dollars, if not into the millions.

Here are two sets of figures—two pictures if you will. Just consider them for a moment.

In the one instance, one man was killed and approximately 100 persons injured, most of them only slightly. Yet the whole Dominion is shocked, parliament is aroused, the law has been ignored, flouted, a crime committed. Immediate government action is demanded by practically all the people.

In the other instance, over five hundred times as many people were killed, thousands were injured, many of whom were maimed and disabled for life, property damage was enormous. But only a passing mention in the local newspapers at the time of each accident, and possibly some casual local comment, but, generally speaking, the public displays little concern and accepts the situation with smug complacency.

Is it not time that the Canadian people shed their indifference in regard to these day by day highway tragedies, and bestir themselves to put an end to such wholesale killing? The Ontario Government says in its advertisement that "Ontario must start 'thinking' safety; that it must be evident to all thinking people that 'this must stop'."

But how is it to be stopped? It is quite correct to say that people must "think" safety; but they must put their thinking into actual practice and "act" safely. But, people will say, in the Regina incident the law was broken. But, so, too, was the law broken in the vast majority of these automobile accidents. Our provincial statute books, and our municipal by-laws, teem with laws and regulations governing the operation of automobiles. Constituted authority has done its part in endeavoring to provide for safety, and to the best of its ability it endeavors to enforce these laws and regulations, but it is an enormous task over hundreds of thousands of miles of roads and highways.

There is only one way to stop manslaughter on the highways, and that is for the individual motorists to stop it—stop it by strictly obeying the laws which have been enacted for their protection and for the protection of others. It is disregard of the law that is the root cause of the trouble. Motorists must discipline themselves; not be disciplined by the law. It is pointed out, for example, that there were more than 800 bicycle riders killed or injured in Ontario last year. Bicyclists, especially children, are often careless. This simply means that drivers of motor vehicles must be "twice" as careful. They must remember that they are in the heavier vehicle. At stop streets and intersections they must "stop". Instead of taking so many things for granted, they must make sure that brakes, tires, lights, are effective; otherwise serious trouble may lie ahead.

Owing to economic conditions of recent years, many worn out and poorly equipped cars are being used. Drivers of these should be exceptionally careful. New makes of cars are more powerful, speedier, and the drivers of these are under a greater responsibility than ever before. They must remember that the old cars are not so speedy, and govern themselves accordingly when passing such cars. These are only a few "musts"; there are many others that might be mentioned.

Some motorists resent all these laws and regulations. They deliberately ignore "stop" signs, and take all manner of chances while knowing their action is contrary to law. But with the mounting toll of deaths and accidents there is bound to be more law, not less, greater restrictions instead of fewer of them. Public opinion will demand and insist on this. So if motorists desire to be free of so much law, they must refrain from being a law unto themselves; rather they must discipline themselves and not act as if they were above all law.

On the other hand, pedestrians and others than motorists using the highways must recognize that motorists have certain rights which ought to be respected. It is largely through the payment of license fees and gas taxes by motorists that our modern highways have been created and are maintained for the use of all. And accidents are by no means uncommon where the motorist is entirely blameless.

Canadians are reputed to be a law-abiding people. A riot is an exceptional occurrence in this country. Law must be respected and obeyed. But in view of the awful death and accident toll on our highways, there should be—must be—not merely observance of the letter of the law, but the whole spirit of it. In a word, the most important law of all for motorists, pedestrians, and others, is "Be Careful". Being careful, practising safety first, will result in the observance of all law.

Must Have General Knowledge

Recruits To Metropolitan Police
Have Frisky Test

Somebody should revise the song: One line of which runs "If you want to know the time ask a policeman!" These days it does not go nearly far enough in London.

For instance—do you want to know the advantages of the hire purchase system to the buyer? Or to the seller? If you are at all curious about it—ask a policeman.

Or do you want to know why a steel ship floats? Ask a policeman. If, in an unduly enquiring mood you can ask the same constable why a fire burns more rapidly if a newspaper is placed in front of it—why a steam engine has a fly-wheel; why tinned goods remain in good condition for a considerable time; why lead is commonly used for water pipes in houses.

Or being of a more sporting than enquiring mind, ask him the same constable to describe to you what is meant by a knock-out, even on the field, a stymie, catching a crab or body-line bowling.

The new policeman will be able to answer you with ease on each of all of these posers, and a good many others besides.

The reason? Well, these were some of the questions given to recruits to the Metropolitan force, and they were only allowed an hour in which to answer them.

There were more, even more tricky, but the above is a good sample.

Astronomer Views Sun Spots

These Spectacles Resemble Large Whirlpools Of Flame

Whirlpools of flame, large enough to swallow up the earth, are marching across the face of the sun.

Clouds stayed away from the sun long enough recently to give H. S. McClung, Regina optometrist and amateur astronomer, and visitors a glimpse of the sun spots.

The spots at present consist of a group of three or four near one edge of the sun's face and a single large one near the opposite side of the 800,000-mile wide disk.

Sun spots, similar to cyclonic disturbances in the earth's atmosphere, are whirlpools or whirlwinds in the brilliant outer envelopes of the sun, exposing the darker inner portion.

About two years ago a period of sun spot activity was entered and the activity will last for about another five years.

Some persons attribute disturbed weather conditions on the earth to the sun spots. They are believed to produce, also, spectacular displays of northern lights.

Study Water Resources

Engineers Now Engaged In Work Over Wide Area

Geological survey of the southern drought section of Saskatchewan is under way.

Recently, 80 senior students, drawn from the engineering department of the Saskatchewan University, started work.

Travelling in 16 up-to-date motor trucks, the survey parties will investigate water resources of approximately 100,000 square miles in southern Saskatchewan and south-eastern Alberta.

The survey party has been organized into 20 sub-parties, each comprising an engineering graduate and two senior students.

The work is being conducted under the direction of Dr. B. R. Mackay, Dominion geologist, and the area extends from the Manitoba boundary west to near Lethbridge, and from the international boundary north to near Saskatoon.

STOP THAT ITCH

In One Minute

D. D. D. Prescription Spinal Relief

It is really surprising to see how Dr. D. D. D. Dempsie, pure, cooling, liquid, antiseptic D. D. D. Prescription quickly stops itching, burning, stinging, soreness, redness, and all other skin troubles. Forty years' worldwide success. Its gentle oils penetrate the skin, soothing and healing the inflamed tissue. No fuss—no muss. Clear, grass-green and stainless—dries up almost immediately. Try D. D. D. Prescription today. Stop the most intense itching instantly. A 35-cent trial bottle, at any drug store, is guaranteed to prove it—or money back. D. D. D. is made by the doctors of HALL'S BATH.

Human Slate

Skin Of Toronto Boy Registers Writing Like A Blackboard

Toronto has a human slate. He is John Darch, 17, whose skin responds to a stick in the same way a blackboard responds to chalk.

Take a stick and write on John, and what is written takes visible shape in the form of a welt that can be felt when a finger is passed over it. How long the writing remains depends on the pressure applied.

FASHION FANCIES

DOUBLE-DUTY DRESS WITH JACKET

By Ellen Worth

Another delightful little jacket dress—if you're needing something fresh and tubular for warm days. So lovely to look at as well as so practical to wear.

A very pretty effect is the plain sky-blue shantung bodice against the navy dotted sky-blue shantung as pictured.

This jacket dress is equally attractive carried out in sheer cotton prints, pastel tub silk, linen, etc.

Few models could be simpler than today's with its sleeveless dress and ruffled sleeve jacket.

Style No. 848 is designed for sizes 14, 16, 18 years, 36, 38, and 40-inches bust. Sizes 16 required 4 yards of 39-inch material with 1 yard of 39-inch contrasting.

Patterns 15c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Summer Fashion Book contains many more smart, cool vacation clothes. Send for your copy to-day, the price is 15 cents.

Evidently Liked Cage

A trailer containing three lions broke loose from a circus truck in Dallas Texas, smashed into a ditch and jarred the cage door open. R. Thomas, the truck driver, went for help. Police arrived and found the three lions peacefully sitting in the cage—the door still wide open.

Seventy of every 100 men in Birmingham who were idle in 1932 have returned to work. 2108

British Mystery Air Craft

Claimed To Be The World's Newest Armed Air Fighter

The new British mystery aeroplane "Fairley Fantome," claimed to be the heaviest armed air fighter in the world, will be brought from its closely-guarded hangar at Hendon soon to roar over the heads of experts in a display for the Society of British Air Craft constructors.

The ship carries four machine guns, one on each lower wing and two atop the fuselage, and also a quick firing gun which throws 200 millimeter shells.

The magazine of this gun carries 60 shells, fired through the propeller hub instead of through synchronized spaces of the whirling blades.

This new machine, expected to reach a speed of 250 miles per hour, has been secretly constructed at a British factory to compete in the international fighting plane competition to be held in Belgium in July.

Advertising Canada

Australian School Children To Write Essays On The Dominion

Australian school children will be encouraged to learn about Canada.

Hon. R. B. Hanson, minister of trade and commerce, explained money voted would be used to conduct an essay competition in Australia among secondary school pupils. A prize of a trip to Canada would be the reward of the pupil who wrote the best essay on Canada.

A similar competition had been conducted in Canada by Australia. Mr. Hanson said the winning pupil was now enjoying her trip to the southern Dominion.

Makes Ideal Insulator

Unexpected insulator has been discovered in the lowly seaweed. When tightly packed it forms an ideal insulating material, keeping out cold, noise, water, or even fire. Scientific tests prove that a mat of seaweed half an inch thick is more effective than a brick wall twelve inches thick. The seaweed has besides only one-fourth the weight of ordinary insulating material.

Sylvania is about 100 miles south-east of Prince Albert.

Says Agriculture Will Continue In The West In Spite Of Any Drouth

Agriculture can be and will be carried on successfully on the open plains of western Canada notwithstanding drouth conditions, said Hon. J. G. Taggart, minister of agriculture in Saskatchewan, in addressing a session of the convention of the Canadian Society of Technical Agriculture at Edmonton, His subject was "The Western Drought Situation."

Grain-growing will be the type of agriculture that will be chiefly followed, in Mr. Taggart's opinion, but other types of farming will be followed as supplementary sources of revenue.

There will be a tendency, he thought, to larger farms and also toward the creation of reserves to provide against times of adversity.

Mr. Taggart, in dealing with the problem of the dry belt, did not regard Alberta's experience with irrigation as sufficiently satisfactory to be followed in the other provinces.

Conservation of water for crop production by dry farming methods is the most important way of improving the stability and productivity of the drought areas, Mr. Taggart believed, and he added that with an average rainfall it should be possible to store from four to six inches of water in summer-fallow land. This he regarded as generally more than could be provided by any feasible irrigation scheme in his province.

Crop rotations will not solve the problem of soil drifting or any other important agricultural problem in the open plains, said Mr. Taggart, and cereal production and summer-fallow in cycles of two or three years will be found the best course.

Physical reserves in the form of seed and fodder should be built up, the speaker pointed out, in any dry country. Groups of farmers might combine, he suggested, to carry such reserves, even though co-operative or community enterprises may not yet be possible.

New methods of making land appraisals will be necessary in view of the present financial difficulties of prairie farmers and the debt adjustment legislation now in operation, it was stated in a paper by Prof. H. C. Grant, of the University of Manitoba. In Mr. Grant's absence, the paper was read by F. W. Reineck.

"The farm mortgage, which was once regarded as a blessing, may now be a curse to both the mortgagee and the mortgagor," thought Prof. Grant. "In the future it may be a share of the social dividend, if anyone knows what that means; but whatever happens, there must be new appraisals of land values."

Instead of farm lands being valued only on a basis of their productive capacity, as emphasized largely under the Farmers' Creditors' Arrangement Act, there must be a consideration, said Prof. Grant, of such points as normal sale value, forced sale value, and speculation, condemnation, loan, and assessed values.

Speaking of conditions in his own province, Prof. Grant pointed out that of 54,000 farms in Manitoba, 19,000 have mortgages on them, totalling \$76,900,000 and averaging \$10.86 per acre. Only one-third of the mortgages are held by loan and insurance companies, it was stated.

After the address by Mr. Taggart, plans of the Dominion government for meeting the problem of the drouth areas were outlined by Dr. S. Archibald, director of Dominion experimental farms. Efforts will be made by the federal authorities, said Dr. Archibald, to co-operate to the full with all the provincial agencies in the field, in order to grapple successfully with the problem of the southern prairie region of western Canada.

Dr. E. S. Hopkins, Dominion agricultural husbandman, told the convention that he is optimistic about dry-land farming, believing that it has a more promising future than general farming in eastern Canada. Some 35,000,000 acres of land in the prairie provinces are affected by dry conditions, Dr. Archibald noted,

and to meet the situation thus created a rehabilitation programme has been drawn up under legislation passed this year at Ottawa. The programme is to run for five years, and the first year's vote is \$750,000, with an additional \$500,000 voted later for water development work.

Ration For Pigs

The Use And Value Of Pasture For Market Pigs Is Shown

In experiments conducted over a number of years at the Dominion Experimental Station, Lacombe, Alberta, pigs fed on a straight grain ration of barley and oats, and allowed access to a small field or paddock sown to a pasture crop, made from thirty to forty per cent. more rapid gains, and from twenty to thirty per cent. more economical gains than pigs fed in dry lots where no green feed was available, and where they were entirely dependent for their nourishment on the grain mixture supplied in a trough or self-feeder. The pasture crop not only supplies succulence, and to a considerable extent avoids the possibility of worm infestation and disease infection, but it also provides the hog with proteins, minerals and vitamins which are lacking when pigs are fed only barley and oats, and no milk or tankage is available.

Experimental results at Lacombe also indicate that pigs confined to sanitary feeding pens and fed inside under what might be called the Danish plan on a grain ration properly supplemented with feeds high in proteins, mineral substances and vitamins, make faster and more economical gains than pigs fed similar feeds under outside conditions in a pasture lot. In a test conducted during the summer of 1934, Yorkshires pigs fed inside on a grain ration supplemented with tankage, cod liver oil and salt, made seven per cent. more rapid gains and fifteen per cent. more economical gains than pigs fed outside with access to an annual pasture mixture of oats and rye on a ration the same except that cod liver oil was not included. The results of this test would indicate that where sanitary feeding pens are available and the proper balancing of rations can be undertaken, there is no serious need for pasture accommodation for growing and finishing pigs of good bacon type and breeding. However, for growing young pigs, gilts and boars for breeding purposes, or for carrying breeding stock, boars and sows, pasture and exercise are very valuable.

Where Dickens Got Names

Register Of Holborn Church Furnished Many Of Them

The two names Oliver and Twist are entered close to each other in the files of the parish register of the church of St. Andrew, Holborn, James Twist, the son of a shoemaker, of Baldwin Gardens, Holborn is recorded as having been born in 1813. Oliver is the name of a woman who was entered in the same year. The discovery is further evidence of the way in which Charles Dickens took many of the peculiar names used in his novels from the register at St. Andrew's. Mr. A. Jones, the vergier, in his normal work, has for many years been compiling a list of names found in Dickens from the files of the Parish register between the years 1735 and 1859. There are now on his list over 60 names of people who probably lived in Holborn during Dickens' stay there. Among other discoveries of the probable origin of names are: Corney, Rigaud, Todd, Minns, Mobbs, Wicks, Topley, Hoop, Binas, Badger and Harmon.

"Notices in a church: 'Worshippers who intend to put buttons in the collection are requested to give their own and not pull them off the hats.'"

Fireflies have no particular value, but to devour snails and the larvae of insects.

Vegetarian Fish

Cleared Shallow Ornamental Lake In China Of Weeds

The centre of the campus of Yenching University, American missionary-supported institution near Peiping, China, is a shallow ornamental lake. Some time ago it was noticed that this lake was rapidly becoming choked with weeds. Ornamental qualities were greatly reduced, and fishermen raised objections to being thrown into the weeds.

Faced with the problem, the business department purchased a large number of "grass fish." These fish, true to their name, are vegetarians, spurning worms, flies and small fry when they can browse off succulent seaweed or nibble at grass hanging in the water.

Like other grazing animals, "grass fish" have prodigious appetites and multiply rapidly. Within a surprisingly short period the lake was cleared of weeds.

An Envious Record

Alberta Claims To Be Lower Than Other Western Provinces In Percentage Of Defaults

With a lower percentage of defaults in municipal debentures than various other provinces, Alberta has an enviable record in municipal finance, Hon. J. R. Love, provincial treasurer, stated in an address.

Alberta's percentage of defaults was only one-half of one per cent, compared with 19 1/2 per cent. for Ontario, 13 per cent. in Manitoba, and 8 1/2 per cent. in British Columbia and Saskatchewan.

Is Possible To Banish Tuberculosis From The Face Of The Earth

Books Play Important Part

Have Great Influence On Lives Of Those Who Read

Books may play two different parts in the lives of men. They may be a respite and an escape from life. They may build for us the walls of another and quite separate world in which we can take refuge from all that wounds and limits and frustrates us in this one. Or they may be the daily bread of our thought and action, an element necessary to the practical working of our lives here and now.

But which ever part they play whether they are to us the quiet garden in which the spirit dwells apart, or the fuel which feeds the active, militant mind and arms it for its encounter with hard facts, they become—whether we know it or not—an integral part of the texture of our being.

St. Kilda's Jubilee Gift

It is stated that the King is to have a length of tweed woven from the wool of wild sheep as a jubilee gift from St. Kilda, the evacuated island off the West Coast of Scotland. The Earl of Dumfries, eldest son of the Marquis of Bute, who bought St. Kilda as a bird sanctuary some three or four years ago, is to make the presentation.

The SNAPSHOT GUILD

VACATION PICTURES

Land or sea offers unlimited opportunities for snapshotting.

With the arrival of really warm summer weather, beautiful trees and flowers, we begin to think in earnest about outdoor life and vacations. I suppose one could go on a vacation without a camera but that would be like trying to sail a boat without a rudder. To say the least it would seem that something important was missing.

When planning a vacation you should look forward to the snapshots you are going to get, for on your return to home and work, and in later years when your trips become fond memories, you can always turn to your snapshots and enjoy your vacations over and over again. Snapshots pay dividends on your vacation investments in continued pleasure long after your return.

There is one important thing to keep in mind in vacation snapshotting and that is the variety of light conditions you may encounter in your travels. Picture taking might well be classed in four groups, according to the exposure they need, and by adopting as a standard exposure for each group, one that is intermediate between the shortest and longest that will make a satisfactory exposure, there will be only four exposures to consider and these can be memorized.

These four groups are as follows: Number one—Marine and beach scenes and extreme distant landscapes. Number two—Ordinary landscapes showing the sky with the principal subject of your picture in

the foreground. Number three—Nearby portraits in the open shade . . . by that I mean not under trees or the roof of a porch and last—shaded nearby homes.

These four groups, or classes, just about cover the different types of pictures you will want to take on your vacation. With modern-day film and cameras, exposure problems have been greatly simplified but it is still necessary to use a little good judgment and not expect the impossible from your camera.

There are many types of cameras to meet every requirement of the photographer, whether he is an amateur or a professional, but no camera is capable of taking all types of pictures under all conditions. It is true that some cameras are more versatile than others. One may have an extremely fast lens which permits the taking of snapshots under adverse lighting conditions and if it also has a fast shutter you can take pictures of subjects moving at extreme speeds. Other cameras have lenses and shutters of various speeds to take pictures—and good ones—within certain limits and conditions.

Almost every dealer in cameras and photographic supplies has printed outdoor exposure tables giving details of exposures, etc., in the four classes mentioned above. Ask your dealer for one of these outdoor exposure guides and then go forth with your camera and take the kind of pictures you'll be proud to show your friends.

JOHN VAN GUILDER

Medically speaking, it is possible to banish tuberculosis from the face of the earth. Dr. H. E. Kleinschmidt, director of health education, National Tuberculosis Association, New York, said in an interview.

"When we say 'abolish,' we do so from the standpoint of control. Plague is not gone, but neither does it ravage the world as it once did, because it is controlled," he stated.

Destroying the old theory that T.B. germs are present in every one, merely awaiting a lowered resistance to take active effect, Dr. Kleinschmidt stated that fully 50 per cent. of the youth of colleges and high schools, particularly in urban municipalities, were infected with early stages of the disease.

"On the other hand," he pointed out, "we have isolated communities where virtually all the children are free of it."

This knowledge is what demands of medicine that, with the help of the public it drop its defensive war and go out in search of the disease.

"To the present our fight with tuberculosis has been defensive, the isolation of definite cases of the disease, mainly in sanatoria. In the last twenty-five years the death rate has fallen about one-third and it has dropped from the chief cause of death down to sixth place.

"These facts are leading many people to think that it is no longer a menace. They are dropping their guard," he said.

The only way to go out and fight the disease is to make an examination of all children with the tuberculin test and the X-ray. The test is very simple, harmless and cheap and merely determines whether or not the germs are present, he said. The X-ray is relied upon to disclose whether any harm has been done.

"By this means we hope to anticipate the disease and not wait for it to develop. It is not a matter of expense so much as it is one of organization and public willingness.

"There is no telling where the germs are," he continued in saying tribute to the X-ray, which had almost replaced the stethoscope and "symptoms," in the diagnosis of tuberculosis. "We used to think that undernourished children were the most susceptible to it. You are just as likely to find it in the healthy, well-nourished child.

"Tuberculosis is a germ infection. Not a single germ, but a definite massive infection. They refer to it as a family disease. It runs through families, not that it is hereditary, but solely as an infection.

"A mother, unconscious of having tuberculosis, kisses her infant child on the mouth; that child has the disease," Dr. Kleinschmidt stated, and placed overwork, lowered resistance, and such generally attributed causes as being merely contributory elements once the germs had entered the body.

Speaking briefly of treatment, he emphasized the practice of lung collapsing as "the brightest ray that ever entered the life of a consumptive."

A relatively new method that has been in use upward to ten years, although it was known before that, it merely entails collapsing the lung or an affected part to allow the lung an opportunity to rest. A more radical treatment is to remove sections of the ribs so that the chest caves in and the lung is collapsed. This is a permanent collapsing, and Dr. Kleinschmidt emphasized one fact: "It is not a cure-all. There are cases to which it is not applicable."

Firemen Forgot Hose

Because firemen of Ratingen, Central Bavaria, forgot the hose when they dashed to a recent fire, the owner of the burned building threatened to sue the municipal authorities for damages. The alert fire fighters answered the alarm promptly and took the latest type of fire engine, but the lack of hose left them nothing to do but stand and watch the building burn down.

WORLD HAPPENINGS
BRIEFLY TOLD

The tri-centenary of the death of Champlain was observed in Paris with exercises emphasizing Franco-Canadian friendship.

Princess Mary, daughter of the King and Queen, has left the hospital where she underwent an operation June 4.

A decree by Adolf Hitler whereby the ministry of war is given permission to enlist foreigners in the German army has been announced.

The Daily Mail said experts are working on behalf of Imperial Airways, with the support of the government to complete a detailed plan for north trans-Atlantic service.

The London Daily Express says Germany now possesses a fleet of war tanks, despite the fact they are specifically forbidden under the Treaty of Versailles.

Want to buy an island? Fanning Islands, Ltd., has two for sale—the Fanning and Washington Islands located 1,000 miles south of Honolulu—but they must remain British and purchasers must be British subjects.

The French government, facing a budget deficit of from seven to eight billion francs (approximately \$482,000,000 to \$528,000,000) for the current fiscal year prepared to make drastic administrative economies.

U.S.S.R. press charged Japan's "deliberate provocations" along the Siberian border and Germany's preparations to attack European Russia placed the Soviet in grave peril of war.

It was learned that Hon. W. J. Roche, chairman of the civil service commission, has tendered his resignation to the government and it has been accepted. He will, it is understood, receive a gratuity of \$7,500, one year's salary, on retirement.

Soldiers On Guard

American Government To Bury Many Millions In Gold

United States government gold valued at many million dollars will be buried in the middle of Fort Knox, Ky., where 1,300 soldiers are on duty.

Treasury draftsmen, it was disclosed, have been ordered to rush construction of a huge underground vault at the army post as part of the government's policy of removing monetary stocks from vulnerable coast cities.

Much gold now stored in New York and Philadelphia will be transferred to Fort Knox. Not long ago nearly \$3,000,000,000 were sent from San Francisco to Denver. Rocky Mountain and the Appalachians thus will guard the precious bullion from any possible enemy invasion or mch.

The government's gold stocks total more than \$9,000,000,000.

Making Tour Of World

Dr. E. Cora Hind Will Write Special Articles During Trip

Dr. E. Cora Hind, distinguished newspaper woman, who was recently honored by the University of Manitoba, sailed from Montreal on the Duchess of York for an 18 months tour of the world. Miss Hind, whose ability as a judge of standing crops and of livestock has made her a noted figure in the Canadian West and earned for her an unique place in journalism will visit the agricultural countries of Europe as well as the new lands where fresh furrows are being broken, writing en route special articles for the Winnipeg Free Press, with which journal she has been for many years.

Actor Stops The Show

A comic singer wearing a hat of the Mussolini type caused a theatre to be closed by the police in the port of Braila, Roumania. His act contained an ironical song at the expense of Signor Mussolini, which was a considerable success—until the Italian consul heard of it. The following day the police closed the doors of the theatre.

When exposed to red or infra-red light, certain types of diamonds generate electricity.

Dies In Poverty

Hero Was Rewarded With Medals, But Could Not Get Work

They pinned medals on Salvatore Bracco, Italian-born, American seaman, a few years ago for his heroism in two rescues on the high seas.

When the S.S. President Harding saved the crew of the stricken freighter Ignazio Florio in 1925, Bracco was the first into the lifeboat which took 38 men from the freighter just as it sank. He got medals from five cities and a scroll from Benito Mussolini for that.

Greater recognition came in 1929 when the S.S. America rescued the crew of the ship Florida off the Virginia Capes. First to volunteer for the lifeboat crew, Bracco directed the rescue work. Former Mayor James J. Walker gave him a medal for his heroism when his ship reached New York. Later he received the congressional medal of honor, two more medals from Italy and six from American cities.

Seaman Bracco died in New Jersey recently in poverty. Ill with heart trouble, Bracco had been supporting his wife and son on a weekly relief grant of \$7.50. "Those who planned meals on me and shook my hand wouldn't give me a job," he complained bitterly to his son a week before he died.

Cavell Grave Neglected

Resting Place Of Martyred War Nurse Is Uncared For

Complains that the grave of Edith Cavell, the martyred World War nurse, is neglected have aroused indignation in England. Visitors to Norwich declare that evidently no care is given it. Nurse Cavell was born at Swardeston, a village four miles from Norwich, and lies buried in Life's Green, close to Norwich Cathedral. Some time ago the public was aroused to protest against the scant attention paid to her last resting place, when many people from all parts come on pilgrimage to see.

The responsible authorities, apparently the Dean and Chapter, took the matter in hand, but to-day fresh criticism is made of the condition of the grave. One observer declared that it is covered with rough gravel and seemingly had been a playground of dogs. On it lay the remains of a wreath of artificial poppies and a few bedraggled daffodils.

Recipes For This Week

(By Betty Barclay)

SOUR CHERRY JUICE

3½ cups (1½ lbs.) jelly
7 cups (3 lbs.) sugar
1 bottle fruit pectin.

To prepare juice, stem and crush about three pounds fully ripe cherries. Do not pit. Add ½ cup water, bring to a boil, cover, and simmer 10 minutes. (For stronger cherry flavor, add ¼ teaspoon almond extract before pouring.) Place fruit in jelly cloth or bag and squeeze out juice. Measure sugar and juice into large saucepan and mix. Bring to a boil over hottest fire, and at once add bottled fruit pectin, stirring constantly. Then bring to a full rolling boil and boil hard ½ minute. Remove from fire, skim, pour quickly. Paraffin at once. Makes about 10 glasses (6 fluid ounces each).

STRAWBERRY FROSTING

2½ cups confectioners' sugar
¼ cup sweetened condensed milk
¼ cup fresh strawberry pulp
1 tablespoon lemon juice
Stir add confectioners' sugar into sweetened condensed milk. Force enough strawberries through coarse sieve to make ¼ cup pulp; add with lemon juice to first mixture. Beat until smooth and creamy. Spread on old cake. Makes enough frosting to cover top and sides of loaf cake, top of 2 (9-inch) layers or about 1½ dozen cup cakes.

War Memorial Fellowship

Cecil Edwin Hall, Edmonton, was the winner of the First War Memorial Fellowship, \$500. It was announced at Toronto recently by the Alumni Federation of the University of Toronto. Hall is an honor graduate in physics of the University of Alberta.

SUNDAY SCHOOL LESSON

JULY 14

NAOMI
(A Woman Of Faith And Courage)

Golden text: "A woman that feareth the Lord, she shall be praised." Proverbs 31:30.

Devotional reading: Proverbs 31:10-20.

Lesson: Book of Ruth.

Explanations And Comments

Elimelech and Naomi Leave Bethlehem for Moab, Ruth 1:1-5. To escape a famine in the days of the Judges, an ancient Hebrew family of Bethlehem, Elimelech and his wife Naomi with their two sons, left Canaan for the land of Moab, a land unloved by the Hebrews because it had blocked the passage of their forefathers through the desert and had killed itself with Midian against Israel.

The sons each married a daughter of Moab. Ten years passed, and Naomi and her daughters-in-law, Orpah and Ruth, were left alone, the father and sons having found their graves in the alien soil. The Parting of Naomi and Orpah, Ruth 1:6-14. Naomi determined to return to her home in Bethlehem, and her daughters accompanied her a short distance on her way. Parents seldom take place in the house in the East. When Naomi thought they had gone far enough to show fitting respect for their parents, she dismissed them. "Go," she bade; "return each of you to her mother's house." The urgent desire to disclaim them. "Go," she bade; "return each of you to her mother's house." The urgent desire to disclaim them. "Go," she bade; "return each of you to her mother's house." The urgent desire to disclaim them.

"Jehovah grant you that ye may find rest, each of you, in the house of her husband," Naomi continued. The two girls wept and said, "Nay, but we will return with you to your people," but Naomi continued to insist upon their return, reminding them that she had no sons who could marry his widow. Again they wept aloud (Mothers' translation) and Orpah said turned back. Ruth clung to Naomi.

Naomi and Ruth Arrive in Bethlehem, Ruth 1:19-22. The women of Bethlehem began to marvel and yet pitifully, it would seem, when they saw Naomi after ten years' absence. It was a severe ordeal for Naomi, and she felt that she had become bitter, and accused God of dealing bitterly with her, for the contrast of her present condition with that of her happy past in Bethlehem was too great. She had gone away with a husband and sons, and now had returned without them. When the women exclaimed, "Is this Naomi?" she answered, "Call me not Naomi (Winsome, Pleasant), call me Mara (Bitter)." But sweetness and peace came again to Naomi.

"A party platform is a mighty important consideration," said one statesman.

"Yes," replied the other, "a party platform in politics is a good deal like a bunker in golf. The rules require it, but you show your skill in avoiding it."

Household Arts

PATTERN 5374

Top your dress with handmade neckwear and you'll be right in step with Fashion's latest. With knitting needles clicking wherever one goes, you will be right in the swim if you knit your neckwear. If crocheting is your choice, the lovely lace jabot will fill your bill. The round collar in perle cotton is knitted in a simple lace stitch—points sold, the open part in a fascinating effect. The vestee with turn down collar is straight ahead knitting in a simple pattern that is repeated throughout. And the whole thing is made of two straight strips, so what could be easier? The crocheted collar is in one straight piece joined at the center. It is lacy and has the flare that makes a jabot graceful.

In pattern 5374 you will find complete instructions for making the two knitted collars and the crocheted jabot shown; an illustration of them and of the stitches needed material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 176 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

National Youth Administrator

United States Offering American Youths A Chance In The World

President Roosevelt has established a "national youth administration" to meet what he called a "great national need" by offering unemployed youth of the United States "their chance in school, their turn as apprentices and their opportunity for jobs."

The new agency will be under the work relief program. The president set aside \$50,000,000 to be used in providing work, apprenticeships in private industry, in offering high school and college training for those between 16 and 25, and in giving relief to youths.

The new undertaking was put under the direction of Miss Josephine Roche, assistant secretary of the treasury, and Aubrey Williams, assistant to Harry L. Hopkins, works progress administrator.

Mr. Roosevelt, in announcing the plan to aid an estimated 500,000 of young men and girls, said:

"I have determined we shall do something for the nation's unemployed youth because we can all afford to lose the skill and energy of these young men and women."

An average payment of \$15 a month for youths on work relief was fixed; \$6 a month would be given to those going to high school and \$15 a month to youths in college.

Leprosy Cure

Report French Scientists Have Obtained A Positive Culture

Two French scientists have obtained a positive culture of the leprosy bacillus for the first time in medical history. It was announced before the French Academy of Medicine.

Dr. Albert Vaudremer, distinguished bacteriologist, aided by a young woman assistant, Mlle. Brun, presented the results of seven years' research to the academy. Their experiment resulted, for the first time since 1871, when the Norwegian scientist, Armauer Hansen isolated the leprosy bacillus, in a positive culture of the deadly organism.

Dr. Vaudremer said the bacillus as cultivated in his experiments was agglutinated by serum taken from leprosy sufferers and that this serum destroyed within 24 hours the leprosy bacillus.

Pessimistic commentator says farming has been tough ever since the auto replaced the horse. It still looks back to its hay day.

Within a 50-mile radius of Spokane, Wash., are more than 90 fresh water lakes.

Little Journeys In Science

ATOMS

(By Gordon H. Guest, M.A.)

Many years ago John Dalton, an English schoolmaster, gave to science a very important theory concerning the structure of matter. This theory, which is known as the atomic theory of matter, assumes that every chemical element, such as oxygen, iron, or gold, is made up of small indivisible particles called atoms; that the atoms of different chemical elements have different weights, but those of a particular element are alike and constant in weight; and that chemical compounds, such as common salt and water, are formed by the chemical union of the atoms of different elements. Thus, an atom of sodium combines with an atom of chlorine to form the smallest particle, known as the molecule, of table salt, while two atoms of hydrogen combine with one atom of oxygen to form a molecule of water.

Recent studies of the properties of matter force scientists to assume the existence of particles still more minute than atoms; so Dalton's idea of atoms has been changed somewhat. The modern scientist believes that the atom is composed of tiny particles, known as electrons and protons. Although a proton weighs as much as 1845 electrons, its positive charge is exactly equal to the electron's negative charge. Each pulls as much as the other.

There are 92 elements and hence there are 92 kinds of atoms. Hydrogen atoms, consisting of only one proton and one electron, are the lightest. Uranium atoms are the heaviest, having 238 protons, and 238 electrons. All atoms, you see, have the same number of electrons are alike and interchangeable, like standardized bricks used in all sorts of buildings. It is believed that the electrons are revolving around the protons, which are located in the centre or nucleus, very much as the earth and the other planets revolve around the sun.

Under normal conditions the diameter of a hydrogen atom is estimated to be about a hundred millionth of a centimetre (254 centi-metres equal 1 inch), which appears to be about twice the usual distance of its electron from its nucleus. The size of an electron is not known with accuracy but it is a very small fraction of the size of the whole atom. The nucleus, or central sun, appears to be still smaller. Thus an atom is largely a vacuum. It has been calculated that if the nucleus of a helium atom were represented by a pea, its two planetary electrons could be represented by two peas a quarter of an inch apart. The electron of the hydrogen atom travels around its tiny orbit very rapidly, going, under normal conditions, about fourteen hundred miles per second. This means that it has to revolve seven billion times in one millionth of a second. These facts show that electrons and atoms are far too small for our comprehension; they belong to the world of the almost infinitesimal. It is a marvelous fact that these tiny particles of matter, like the heavenly bodies, are never at rest.

The information concerning the structure of atoms has been obtained by the wonderful instrument known as the spectroscopic, by X-rays, and from a study of such elements as which are continually breaking down into other elements.

Secret Of Magic Sword

Weapon Of Serbian Heroes Was Made Of Nickel Steel

The old Serbian "heroes" of the Dark Ages, according to legend, were armed with "magic swords which cut through their enemies' armor." Now a mining prospector, examining ancient workings in old Serbia, believes he has discovered the secret of those "magic" weapons. They were made, not of iron, but of nickel steel. In an old working he came on a piece of metal which is probably the oldest piece of special steel in existence. In vain he tried to bore a hole in it. Finally he sent it to Vienna to be examined. Here again difficulty was experienced in piercing it and analysis showed that it was nickel steel of peculiar hardness. The circumstances under which this piece of steel was found suggest that it is at least 1,000 years old—that is, it was in existence 900 years before nickel steel was rediscovered.

Boys are not as good sleepers as girls, according to tests made by an Atlanta physician. His conclusion comes after 150,000 hours of watching children sleep, by means of special electrical instruments.

All men are born free and equal, but most of them get married.

MASS BUYING PROBE EXPENSES ARE SUBMITTED

Ottawa.—The mass buying commission cost the Dominion treasury about \$475,000. Hon. R. B. Hanson, minister of trade and commerce, told the House of Commons, but he believed "a very large sum of money" had been turned into the finance department from tax-dodgers brought to light during the probe.

The minister said he was not sure of the tax collections because they did not come under his department. He had been informed however, they were substantial.

William Goding (Lib., South Huron) protested against Norman Sommerville, of Toronto, commission counsel, being paid a daily fee of \$150 and \$15 expenses a day. He said Sommerville was paid for 196 days although the commission only sat 124. The remaining 72 days were occupied with Sommerville "schooling and prompting witnesses," consulting auditors and investigators, although "my own opinion," he said, "is these witnesses should have come without any interference whatever."

The South Huron member said one witness from the west was on the stand only a few minutes one day although his bill was \$149.50. An ordinary three-cent stamp represented the value of his evidence. Another witness cost over \$150 to suggest farmers be stopped from selling produce on their farms and urging rail-grading for hogs.

The government had no control over fees, Mr. Hanson said. The commission paid its own accounts. When Sam Factor (Lib., Toronto South-Centre) charged the accounts of auditing firms, particularly Clarkson, Gordon, Dilworth, Guilfoyle and Nash, had not come before the commission, the minister promised to bring the account.

New Wheat Board Bill

Farmer May Now Sell Under Two Plans

Ottawa.—The interpretation of the new wheat board bill as viewed by the special committee of the House which revamped it, was explained by John Vallance (Lib., South, Battleford), one of the members of the committee.

"Let us take for example a minimum price of 70 cents a bushel," said Mr. Vallance. "The producer would have to decide whether he would turn over his wheat at that price to the board and be entitled to further payments if the board operated at profit or year out entirely at a higher price to the grain trade."

"The minimum price would be fixed at the start of the crop year. Provision is made that the price would not be lowered during that crop year and there would be no object in increasing it during a crop year for the producers in any event would get the benefit of any higher price the wheat might bring."

"This act differs from the Argentine method in that under control in that country the board only buys when at the minimum price and pays no premium to producers if it makes a profit."

"The new bill is fairly acceptable to Liberal members of the committee with the important exception that they wanted the board appointed for one year only with provision for extending it from year to year, if thought necessary. The measure on the other hand makes the board permanent unless eliminated by act of parliament."

Wheat Marketings Lower

Ottawa.—Wheat marketings in the prairie provinces for the week ended June 21 amounted to 1,704,259 bushels, a decrease of 997,227 bushels compared with the previous week, and a decline of 947,005 bushels against the same week last year, the Dominion bureau of statistics reported.

Rudyard Kipling's Works

London.—Some 310 examples of Rudyard Kipling's early works, published in newspapers, were sold at auction for £230 (about \$1,150).

Plenty Of Moisture

Conditions Throughout Canada Generally Favorable

Ottawa.—Moisture conditions throughout Canada are generally favorable to growing crops, says the telegraphic crop report issued by the Dominion bureau of statistics.

Dry areas are practically confined to Vancouver Island, parts of the lower mainland of British Columbia, districts in southern Alberta, and parts of southwestern and west-central Saskatchewan.

Crops are late throughout Canada and except where moisture is limited, warm weather is needed to promote growth, says the report.

The report continues: "In prairie provinces grain crops have made good progress during the past two weeks. Drouth areas are limited. The most favorable conditions now exist in Alberta where drouth is an important factor in the south."

"In British Columbia dry weather has reduced yield on Vancouver Island and in the lower mainland area. Conditions are satisfactory in interior parts with fruit crops developing rapidly."

"Manitoba: Rainy weather continues in Manitoba and during the last half of the week drenching rains were received over the western portion of the province."

"Grain crops are about one week late and growth is heavy."

"Saskatchewan: Rainfall during the past week favored the eastern and northern sections of the province. Recent warm weather has stimulated growth and crops in most parts of the province have made good progress."

"Moisture conditions are generally satisfactory but rains are still needed in southwestern and west-central Saskatchewan. Grasshoppers are still hatching but outbreaks are very patchy and have been effectively controlled. Cut-worms and wire-worms are active in some areas. Root rot is also reported. Summer fallow is about half completed. Pastures are in good condition."

Senator May Resign

Will Leave 17th Vacant Seat In Upper House

Ottawa.—While the resignation had not been received by the Dominion government or the speaker of the Senate, it is understood Senator John McLean (Cons., Souris) intends to resign his seat in the Upper House. Illness has prevented the 88-year-old Maritime Senator, oldest member in the upper chamber, from attending in the Senate last session of this year.

When it does occur the resignation of Senator McLean will create the 17th vacancy in the upper chamber. Hon. J. A. Macdonald, member of the Bennett cabinet for Prince Edward Island, is mentioned prominently as successor of Senator McLean.

Japanese Steamer Sinks

Collides With Freighter And Over 100 Persons Drowned

Oosaka, Japan.—The collision of a small Japanese steamer with a freighter on the pitch dark, fog-bound Japanese inland sea claimed 104 lives, a checkup by shipping officials disclosed.

Crowded with holiday passengers the steamer Midori Maru rammed with the freighter Senzan Maru and sank almost immediately.

Rescue vessels, including the Zenzan Maru, picked up 91 of the 166 passengers of the Midori Maru and 56 members of the crew of 85 in the storm-tossed sea. Eleven bodies were recovered, including those of three women and an infant.

New C.P.R. Ships

Glasgow.—The Canadian Pacific Steamships will replace its liner of the older type lately discarded, Sir E. W. Beatty said on the occasion of his inspection of the giant new Cunarder, "Queen Mary," now building.

Trade Treaty With Poland

Ottawa.—Premier R. B. Bennett announced in the House of Commons a trade treaty has been signed between Canada and Poland. He tabled a copy. 2106

NEW PRIME MINISTER

Hon. A. A. Dymally, leader of the Liberal Party in New Brunswick, who, by virtue of his overwhelming victory in the recent provincial general elections, becomes the new Prime Minister of New Brunswick.

Air Liner Reported Lost

Believed To Have Fallen Into Channel Off Isle of Wight

Portsmouth, Eng.—A destroyer and Royal Air Force flying boats searched in vain for a British air liner reported to have fallen into the channel off the Isle of Wight after sending out SOS calls. No trace of the wreckage was found but a patch of oil on the surface about 10 miles from shore gave a clue to the probable fate of the two persons aboard, Pilot Captain Ogden, 30, and a passenger named Grainger. The machine was flying to England from the Channel Islands.

Wins Wager For Hike

Saskatchewan Man Completes 10,000-Mile Walk Ahead of Time

Sudbury, Ont.—Ernest A. Wall, of Waldeck, Sask., the 10,000-mile hiker, arrived in Sudbury, July 2. He reported he had completed his 10,000-mile walk, four days ahead of time, "winning" a wager with the mayor of his home town that he would accomplish "the feat in one year. He left Waldeck July 6, 1934, and spent six months in New Brunswick. Wall says he has the original 10-cent piece with which he started his journey.

Heavy Rains In B.C.

Nelson, B.C.—Damage to highways and bridges has been fairly heavy in the Kootenay and Okanagan districts where rivers and creeks have been swollen to new and levels by the heaviest rains in 10 years, British Columbia public works officials here said. The Mission river at Kelowna has broken all flood records.

ARABIAN CROWN PRINCE VISITS LONDON

Here we see the Crown Prince of Saudi Arabia being welcomed by the Earl of Dunmore, on behalf of King George, on his arrival in London on a visit. The Emir Saud is heir to King Abdul Ibn Saud.

New Tariff Adjustment

B.C. Premier Sees Necessity Of Revision Of B.N.A. Act

Prince Rupert, B.C.—Necessity of a revision of the British North America Act as it affects the relations of the provinces with the Dominion was stressed by Premier T. D. Pattullo in a luncheon address.

The necessity of such revision was being recognized with unanimity all over Canada, the premier said, even in Ontario and Quebec and it was important the people of this province should realize it.

Tariff adjustment to permit of fairer treatment for British Columbia in relation to the east and a re-definition of sources of revenue and taxation for Dominion, provinces and municipalities to eliminate overlapping and ease as far as possible the tax on land were also essential Premier Pattullo declared.

Bonus To Be Paid

Farmers Shipping Milk To Cheese Factories Will Profit

Ottawa.—For the month of July, a bonus of 1½ cents a pound will be paid all farmers who ship milk to cheese factories, Minister of Agriculture Robert Weir announced in the House of Commons.

The money will come from a fund of \$1,000,000 which the House considered as a means of equalizing dairy prices.

Primary reason for the cheese bonus was to prevent farmers switching production from cheese to butter and forcing down prices to world figures.

First bonuses will be paid in July, the minister said, through the cheese factories. It would be at least 1½ cents a pound and might run to 1½ cents.

Frown On Seances

Bishop Of London Warns People Against Spiritualism

London.—The bishop of London, Rt. Rev. A. F. Winnington Ingram, issued an order forbidding any church building in his diocese to be used for seances and warned people against the "peril" of getting in touch with spirits through spiritualism. Writing in his diocesan leaflet, he urged them to give up "this unauthorized attempt to communicate with the other world," and described their efforts as "very dangerous, dishonoring to the dead and waste of time for the living."

New Air Mail Service

Bombay.—The British government's new air mail plans provide for an air service operating between London and Australia and between London and the Union of South Africa, by way of Egypt, it was announced.

HEAVY DAMAGES FROM FLOODS AND STORMS IN WEST

Winnipeg.—A two-year-old boy was given up for dead as western Canada counted damage of thousands of dollars from the worst storms and floods in 25 years.

In western Manitoba, eastern Saskatchewan, the Peace River area of north Alberta, and in British Columbia rain-swollen streams overtopped their banks, inundating farm lands, sweeping away bridges and driving settlers and farmers from their homes.

Five bridges already have been wrecked in the Kootenay and Okanagan districts of the coast province. The Mission river at Kelowna has broken. Flood records, officials said, while at Penikese two bridges have been carried away. The police building at Kamloops is surrounded by water.

Slave Lake, Alberta, residents abandoned their homes to seek refuge of tents on higher ground. Every stream and river in the Peace River country was reported on the rampage, with no indication of a let-up in the flood situation.

A serious situation existed in northwestern Manitoba following a weekend of storms that brought 8½ inches of rain to one point. Thousands of acres of farm land were hauled out in the Grandview district, with damage up to 80 per cent. Hundreds of poultry were drowned, hayricks, granaries and small barns carried away. Gales and hail tore off roofing and flooded stores.

At Sorketon, police withdrew from a three-day search for two-year-old Arthur Godaworth, who celebrated his second birthday recently.

The boy disappeared then, and police considered it impossible he could have survived three nights of torrential rain and mosquitoes.

"Though the rain had ceased, floods in western Manitoba showed no signs of subsiding. Highways were washed out and farm lands flooded over a wide area. A Canadian National Railway train was derailed into a ditch by flood-covered rails, four coaches buckling up behind it. No one was reported injured."

A gale of cyclonic proportions wrecked the farm buildings of Alex. Dykman, at Gilbert Plains, where the train was derailed. His house and contents were strewn for a mile from where the dwelling was situated. Dykman was injured when part of a wall toppled upon him.

Employees at the Dauphin, Man., power house worked to maintain a crippled electric light and power service, pumps fighting to keep rising flood waters from the machinery. The dam at the town's source of water supply was swept away.

But on the brighter side of the flood picture was the lush green verdure over the entire western Manitoba and eastern Saskatchewan.

A New Racket

Ottawa.—The new "racket" of signing books or sheets and contributing \$1.00 or similar amounts in anticipation of getting higher returns if additional personal sign, is declared an offence against the criminal code under an amendment adopted by the senate banking and commerce committee. Any operator of such a scheme may be fined up to a maximum of \$500 under the amendment.

Radio Commission

Ottawa.—The House of Commons retraced its steps to make a correction in the bill extending the life of the Canadian Radio Commission until March 31, 1936. Under an amendment to the bill made in the senate the whole radio act which established public ownership of radio would have terminated on that date.

Venusian Active

Naples.—Mount Vesuvius erupted with a tremendous explosion blowing a piece of its cone from the crater high into the air. Naples residents were alarmed but the Venusian observatory issued a statement minimizing danger of the eruption.

Liberal Cause Steadily Gaining

Mr. Geo. J. Bryan, the Liberal candidate, has been holding meetings continuously through Stony Plain Riding for some time, and judging from the size and enthusiasm of the meetings, the Liberal Cause is steadily gaining ground. Recent meetings have been held at Clymont on Saturday; Tecumseh on Monday; Sandhills, Tuesday; Keep Hills on Wednesday.

"Les" Robbins a Candidate.

Those who were acquainted with Mr. Leslie G. Robbins, the popular teacher at Rosenthal school some ten years ago, and who, later, taught for several years at Stony Plain Public school, will be interested in knowing that "Les" was nominated at Radway Center on June 30th by the United Front Party as candidate for the Provincial Constituency of Sturgeon. Mr. Robbins is the principal of the High school at Wahsenaw at the present time. Mr. Jan Lakeman, the Edmonton Communist candidate, was a speaker at the Robbins meeting.

Sturgeon Constituency was represented for a number of years in the Legislature by the Hon. John R. Boyle, until the seat was captured by the UFA candidate in the election of 1921. Hon. J. Russell Lowe, Provincial treasurer, is the candidate of the UFA party in the coming election for Sturgeon Constituency. There is a Liberal candidate in the field, also.

Herman's Big Day.

Herman Loeblich, the well-known baseball twirler from Spruce Grove, entered baseball's Hall of Fame, at Renfrew park, Edmonton, Sunday afternoon when he pitched a no-hit, no run game, hurling the Shasta-Royals to a 7-0 victory in their game against Wainwright.

BUTTER AND EGGS WANTED
at The Royal Cafe.

Says Editor Roper.

Editor News: I know a Calgary school teacher who was in Edmonton just 2 years ago marking examination papers. An Edmonton teacher (who has a lot to answer for) loaned him a book written by a man named Douglas. The Calgary teacher read the book. I understand it was the first book on economics he had ever read; his first lesson. Not only was he impressed with the instruction contained therein, but after reading the book he felt capable of teaching everyone else about it.

Hold-up, New Style.

First Young Lady: Did you ever have a pair of garters that would really hold up your stockings?

Second Young Lady: No, dearie; but I have a pair that held up traffic on Jasper ave. for about 10 minutes, Monday.

Social Credit Picnic
at Brightbank Schoolhouse,
WED., JULY 24th.
All Kinds of Games.
Speaker, W. E. Hayes.
Dance in Evening.
John Kyle, Pres.
W. Hodgson, Sec.

Striking while the iron is hot is a characteristic of the West that has gained the admiration of the rest of Canada. And so there is little surprise in the announcement that the Board of Trade at Invermere, B.C., has leased the bungalow camp at beautiful Lake Windermere for this summer, in anticipation of increased tourist traffic to the Canadian Rockies, which has been generally forecast in Europe, the Orient, and the United States.

The camp, which is being taken over by small but energetic Invermere, is one of the most delightfully situated in the world. Built originally by the Canadian Pacific Railway, this camp has been successfully operated for the past

several years as a private camp for girls. In the centre of an ideal vacation district, it is easily reached by main mountain highways. The famous Bearf-Windermere road leads to it, a good alternative route being through the mountains from Cranbrook. The lake averages about 65 degrees in the summer and is ideal for swimming and boating. Excellent trout fishing can be had in several creeks and smaller lakes near by and the lake itself has landlocked salmon of considerable size. Within a day's ride is the celebrated Lake of the Hanging Glaciers, with its spectacular glaciers all concentrating in one morning with an ice wall several hundred feet high which drops a continual succession of small icebergs into the lake.

Sparksie Sez:

Ain't this a heck of a world?—if you don't worry you go to the poorhouse; and if you do worry you are liable to be put under surveillance.

A punctured tire is an incident; a cracked windshield is an accident; and a broken steering gear a funeral—usually.

CHAPTER VII.—Continued

"It's gorgeous, isn't it?" breathed Nancy, truly impressed. "I'm sure I'm going to love this room."

Cousin Columbine smiled. "It's our best, and I'm glad to see that you appreciate it. Jack will be next to you with only a door between. I sleep downstairs; and as I stated in my letter, Aurora goes home at night. Victor Tubbs is an invalid, or thinks he is, which amounts to the same thing; and his wife has supported him for years; a state of affairs that satisfies them both, though it makes me furious. However, it's none of my business; and if Aurora wants to work her fingers to the bone for such a salary, why worry? My Mark Adams would say? Now I'll leave you in peace. No doubt you'll prefer to unpack alone though Aurora was itching to see your wardrobe, and as she had, not so much as a safety pin would have escaped her eyes, and the account would have been spread from one end of Pine Ridge to the other before she slept tonight."

The old lady moved toward the door, then stopped to add: "If you need a lamp, the matches are in that tin box on the wall. Supper's at six sharp, so Aurora can get home to feed her precious Victor. There's water in the pitcher; but you may wash in the bathroom if you prefer."

She was gone at last, leaving Nancy rather breathless with instructions. Jack had departed to his own quarters, and the girl stood quite still, looking about curiously. She had meant the view, of course, when she told Cousin Columbine that she loved the room. Now, sitting down suddenly on a straight, uncomfortable "bedroom chair," she wondered how it was possible to get so many ugly things into one place.

The bed! Towering back walnut, ornately carved. It was cold com-

fort to remember that her grandfather had had one almost as hideous at Edgemere. A bureau to match; even a washstand, behind which hung a square of linen to protect the wall paper. Hadn't she heard someone where they were called "splashes" in the dark ages when people used such things?

Nancy arose to regard this curious antique on which, embroidered in red cotton, was an infant splashing happily in a wash bowl, with the words, "Our Darling," below it. Horrors! Must she live with that monstrous baby for months and months? Must she wash in that bowl—even brush her teeth into it?

The girl could have wept for her own little dressing room; then remembered that it was hers no longer anyway. She turned slowly to observe a marble-topped table between the windows—a patent rocking chair upholstered in flowered carpet—a shelf above the light-tight stone at which stood two blue vases and what appeared to be a mound of mineral specimens mysteriously glued together, with a clock in the centre, a silent timepiece now, probably useless save as an "ornament."

Nancy's eyes lifted to the wall paper, a nondescript, faded tan, which, she decided, "might be worse." But the pictures (only two, thank goodness) were simply terrible. One painting of a deformed, scrawny kitten playing with a ball of yarn and a steel engraving of General Grant. Could anything be more depressing.

As if to get away from all these objects, Nancy moved to a window, half sick at thought of the long weeks ahead. There was descending, and even the Peak, rising now against a gloomy sky, looked austere and forbidding. All the excitement of their arrival—the elation she had felt during the wonderful ride in Mark Adams' motor—her interest in this new part of her own country—even the girl's sense of humor, were lost in an attack of overwhelming homesickness.

Aunt Louise had been right, she told herself. They shouldn't have come so far away. This terrible room! What would the girls at home think if they could see that washstand? And the pin-cushion. Why it was bigger than a boulder pillow! And what in the world was she going to do with herself when the day came that Cousin Columbine imposed were finished? There would be nothing—absolutely no way to kill time. This thought, to pleasure-loving Nancy Nelson was appalling—not to be endured. Her unhappy eyes, resting on Pike's Peak, saw only a cloud filled with dancing frocks and a white fur wrap that she had never worn. She had to wink to keep the tears out of her eyes as she vowed audibly:

"I'll write to-night and tell Dad everything. Didn't he say that homesickness might as well be fatal? He'll understand. He'll send for me if he has to borrow money for the ticket. Jack will call me a slacker, but who cares? I just can't stand it here. I'd almost rather die than stay. What can there possibly be to interest a girl like me in a dreary, ramshackle, down-at-the-heels settlement like Pine Ridge, Colorado?"

Later Nancy was to realize that as she stood there, oblivious to everything save self-pity, she hadn't known what sort of girl she was.

CHAPTER VIII.

"There's nothing," observed Jack from the door of his north-east bedroom, "like good, thick, sirloin steak to bolster up a morale that's slipping. Remember that, Sis."

It was eleven at night, and Nancy, attired in a wadded dressing gown of crimson silk, turned from the bureau to ask coldly: "May I inquire whose morale you have in mind?"

Her brother smiled as he investigated the patent rocking chair. "I'm no morose, Nancy. I knew when I found you staring out of the window in the dusk, that you were planning your escape. That's why I opened the door into that frigid hall. The aroma of broiling steak was in the air and I felt sure it would revive that fainting spirit—stiffen the backbone—stir your pioneer blood."

"Brush up," warned Nancy. "Our voices will disturb Cousin Colum-

WAS CONSTIPATED FOR 30 YEARS

Woman's Long Search for a Remedy

The trouble with most remedies for constipation, as this woman found, is that they give only temporary relief. Having at last found a permanent corrective, she writes to tell us about it.

"For upwards of 30 years I was a victim of acute constipation. I tried practically everything that it was possible to try. I admit I was a chronic case, and every new remedy I tried helped for a day or two—after that I was just as bad as ever. Three months ago I took my first taste of Kruschen Salts, and every morning since, and every morning so long as I live, my first duty upon rising is to my Kruschen. I honestly feel a different woman. My bowels act to the clock, and my friends remark how well I am looking. My own opinion is that I didn't try Kruschen years ago."

(Mrs. A. M. Kruschen Salts is Nature's recipe for maintaining a condition of internal cleanliness. The six salts in Kruschen stimulate your internal organs to smooth, regular action. Your system is thus kept clear of those impurities which, allowed to accumulate, lower the whole tone of the system.)

an unheard of hour. Say!" the girl came nearer, whispering: "Did you ever see anything like a more soul destroying than this room?"

Jack grinned, gesturing with a thumb toward his own quarters.

"You should see mine! Not even a view, my dear; and it lacks this handsome walnut furniture." The boy's eyes shone with admiration, and though she wouldn't have believed such a proceeding possible a few hours earlier, Nancy laughed a little. She didn't realize that after a leave of absence her sense of humor was returning, but she knew that something made her feel better.

"It was a wonderful supper, wasn't it?" she murmured.

"Trust you to appreciate it! And what swell china! I wish Aunt Lou could see it."

"It came from Denver in 18—well, eighteen—something-or-other, anyway. There's a complete dinner set. Imagine choosing that awful green-brown pattern! And Cousin Columbine's so proud of it, too. How on earth does she remember the date that everything was purchased?"

Jack shook his head, remarking in muffled tones: "She's a wonder, isn't she? What else would have thought of cooking up that letter as a what did she call it? Character test? You've got an awful lot to live up to, Sis, if you ask me. Hop into bed. I'll open the windows. And don't forget that breakfast's at seven sharp."

Sleep did not come quickly to Nancy that night. She lay there under a patchwork quilt (whose weight, she wrote Aunt Judy later, was "almost crushing"), and thought about the evening that had just passed. There must be some truth in Jack's statement regarding the sirloin steak. What else could account for her more cheerful frame of mind? For Nancy had been ravenous despite that slice of chocolate cake—the ugly, green-brown china, and a lamp in the centre of the table that was homely enough to ruin almost anybody's appetite.

There was no doubt that Aurora could cook a steak; and with unexpected tact, Jack had done most of

the talking, leaving his sister free to get herself in hand after what she now called her "brain storm." And when Aurora had gone, Jack carried that awful lamp into the sitting room and Cousin Columbine remarked casually, though her eyes twinkled: "I suppose you're thinking me an outrageous humbug, but—you can share, while I confess."

This confession with its illuminating detours into the past, had kept Cousin Nelson talking until long after her customary bedtime.

"I'm going clear back to the beginning," she explained, "so you'll understand, if possible, just why I posed as a tottering old relic, too frail to stay alone at night. The truth is, there's nothing to be afraid of here, and if there were I wouldn't turn a hair. To one who can remember the Indian troubles of 1868, and as a child I have hidden for hours in fear of hostile savages, well—you can readily see why an ordinary prowler would be tame in comparison."

She looked up, smiling; while Jack, eyes popping out of his head, exclaimed: "You really live through things like that?"

"Why not?" asked the old lady calmly. "This was nothing but wilderness when I was born. As you've heard tell, my first home was a covered wagon which, naturally, I don't remember. I do remember a house with a dirt floor and a stone fireplace in one corner, however; and dimly recall the furniture made from poles and rough-hewn lumber. It was home, and nothing to be ashamed of, but no one else nearby had anything better."

"But wasn't it frightfully cold?" said Nancy. "A dirt floor, I mean?"

"I suppose it must have been—at this altitude; but Mother took care that I shouldn't suffer, of course. I can remember being tucked up on the bed with quilts all 'round me, watching the snow swirl against a tiny window, and loving it—I was so warm and cosy! It was my mother who suffered. Men can stand hardships better than women; and even in those days Father seemed always to be—well, my dear, to express it as you would, he seemed to be having the time of his young life."

"Did that cabin stand where this house does now?" Jack questioned.

"Very nearly. It was a bleak spot then. Except for the big pine beside the barn, Father planted every tree himself after he built the mansion."

"But why, when there was plenty of land to choose from, didn't you build back in the woods where it was sheltered?"

"Fear of two things," responded Cousin Columbine. "Fire, and Indians. If the savages were to attack us, we at least had a chance to see them approaching if we were in the open. And a forest fire's a terrible thing in the wilderness. I recall when I was a tiny girl,

What's wrong with this Mustard, Mary? It's very poor stuff! Why John—

I thought I was getting a bargain—a big bag for 10c

"It's no bargain at any price! I'll bet you would get more actual mustard in 10c worth of Keen's than you would out of any 10c substitute. The extra bulk is only flour, ground up hulls and colouring matter!"

"You're right! From this time on I'm going to stick to Keen's."

KEEN'S D.S.F. MUSTARD

Made from seed grown especially in the Fens of England. The shells or hulls are removed, all the virus being in the inner part of the seed. A superior grinding makes the full flavour readily available. An original size for a little as 10c—

Keen-Kean (Canada) Limited
1000 Amburst Street Montreal, Que.

watching one at night with my courageous little mother. We were all alone, Father having gone to California. Quick in search of gold. Looking back on those times, I don't see how she endured his absence, even though there were other cabins not far away. That fire was a terrifying sight, my dear. It must have been miles off, but looked almost near enough to touch. The growth was very thick and tall just there, and the flames seemed to leap from tree to tree, and as they reached the top, shoot up into the air, far up, higher than you'd believe possible, before subsiding. I have never forgotten it."

Nancy shivered; and Cousin Columbine continued: "So you see why we built in this bare place."

"And did your father find the gold?" Jack questioned.

"Not then. Not ever to any great amount. It was Leadville silver which built this mansion; but your Mother never saw it. She died in 1874, when I was fifteen. A wonderful woman, my dear. She had the true pioneer spirit, but not the body to stand up under the pioneer hardships. She was only thirty-five when she left us to join my little brother who died in infancy."

(To Be Continued)

Peace Garden

Transfer of 2,000 acres of Manitoba government land to directors of the international peace garden in the Turtle Mountain reserve was officially completed recently. The land will be utilized to extend the garden on the Canadian side of the international boundary.

RELIEVE PERIODIC PAIN

If you suffer periodic pain and discomfort, try Lydia E. Pinkham's Tablets. In most cases they bring welcome relief. As Mrs. Caroline Nelson says, "They ease the pain."

Mrs. Raymond Chiput, Route 4, Tilbury, Ont., says, "I suffered some thing terrible. Had such backaches and headaches I was worn out. Your Tablets helped me." Let them help you, too. Ask your druggist.

Lydia E. Pinkham's TABLETS

SOCIAL CREDIT LEADER GIVES AN ADDRESS IN STONY PLAIN.

Wm. Aberhart, B.A., Greeted by Larger Crowds than on His Former Visit Here in May.

As on the occasion of his former visit to Stony Plain. William Aberhart, B.A., leader of the Social Credit forces in Alberta, met with a crowded hall on his appearance here on Tuesday Evg. Arrangements had been made for an overflow meeting, and this was held in a nearby hall, to where wires and an amplifier relayed the speeches from the main hall.

Mr Aberhart was accompanied by Mr Manning of Calgary. Mr W. E. Hayes was in the chair.

Mr Manning gave an interesting account of conditions as he has seen these, while traveling thru the country. He was followed by the speaker of the evening, Mr Aberhart, who in his opening remarks intimated that the processing taxes or a tax on unearned increment would provide the money necessary for basic dividends under social credit. For example, the speaker said, it would be possible to levy a 65c tax on a bu of wheat selling at 60c. The tax, he said, would be 5c to the farmer after he had received the "just price"; 10c to the miller; and 50c to the baker, made up by 1c on each loaf of bread.

There was loud applause when Mr Aberhart denounced the Fifty Big Shots who, he said, owned Canada. He said that he was unable to understand critics who had likened his Plan to pulling rabbits out of a hat. To the speaker it was as simple as a, b, c. He mentioned that Prof. Elilo of the University of Alberta, had testified before the Agricultural Committee that the value of Alberta's production was \$180,000,000 a year. Assuming that \$140,000,000 was needed to feed, clothe and shelter every person in Alberta, there would be \$40,000,000 left for the more enterprising and industrious. "Then they ask where the money is coming from," he added.

His followers were advised to pay no attention to pamphlets issued by his opposition. They should ignore men who tried to deceive them.

Continuing, he said; You must first decide that there must be a change and then be convinced that a change is possible. He was grieved over the treatment accorded the young unemployed men when on their On-to-Ottawa march. All they asked was work and wages.

He condemned the System for attempting a solution by destroying food such as wheat, coffee and pork, which the Lord had provided to feed His people.

LOCALS.

Mrs E H Baron left yesterday by aeroplane for Beaver Lodge, to be present at the funeral of her brother-in-law, Mr O'Brien, who had received fatal injuries in a motor accident on Sunday.

Henry Schultz, from Barrhead, was visiting in Stony on Tuesday.

Jerry the Busman's Sunday trip here was delayed several hours, owing to the condition of the roads near Wildwood, following on Saturday night's cloudburst.

For the BEST VACATION YOU EVER HAD

GOING VACATIONING soon? Start out in a new Master Chevrolet and assure the success of your holiday plans! You travel smartly in this aristocrat of low-priced cars. You travel dependably, economically, care-free. And best of all, you travel in Canada's most modern low-priced automobile—the only car in its class with the safe new Turret Top bodies by Fisher... with Knee-Action front wheels... with Cable-Controlled Brakes, Blue Flame Engine and Fisher No-Draft Ventilation! Your nearest dealer can make immediate delivery of your new car... call in and see him today. At the same time, look over the new Standard Chevrolet, the lowest-priced fully equipped car on the market. Easy GMAC terms.

THE TURRET TOP... the newest, safest automobile body construction known. The roof of the car is one solid, seamless sheet of steel—extending down to steel sides and a steel floor. A Fisher Body advantage, offered only on the Master Chevrolet in its price class.

KNEE-ACTION... owners and engineers both agree, you must have Knee-Action front wheels for the ultimate in riding ease! Only the Master Chevrolet in the low-price field gives Knee-Action plus balanced weight.

BLUE-FLAME ENGINE... Chevrolet's latest development of the famous valve-in-head six-cylinder engine. Proved economy and dependability—along with power and performance!

CABLE-CONTROLLED BRAKES... Another exclusive Chevrolet feature—for smooth, equalized, positive braking under all conditions.

FISHER VENTILATION... the proved, built-in No-Draft system pioneered by Chevrolet. Actually cools the car interior in hot weather.
